**APPENDIX C**

**CALIBRATION DATA AND CURVE**

**Figure C-1** Calibration curve of GC/ECD

Calibration Table

---

Calib. Data Modified : Tuesday, October 07, 2003 6:13:24 PM

Calculate : Internal Standard  
Based on : Peak Area

Rel. Reference Window : 5.000 %  
Abs. Reference Window : 0.000 min  
Rel. Non-ref. Window : 5.000 %  
Abs. Non-ref. Window : 0.000 min  
Uncalibrated Peaks : not reported  
Partial Calibration : Yes, identified peaks are recalibrated  
Correct All Ret. Times: No, only for identified peaks

Curve Type : Linear  
Origin : Included  
Weight : Equal

Recalibration Settings:  
Average Response : Average all calibrations  
Average Retention Time: Floating Average New 75%

Calibration Report Options :  
Printout of recalibrations within a sequence:  
Calibration Table after Recalibration  
Normal Report after Recalibration  
If the sequence is done with bracketing:  
Results of first cycle (ending previous bracket)

Default Sample ISTD Information (if not set in sample table):

#### Calibration Curves

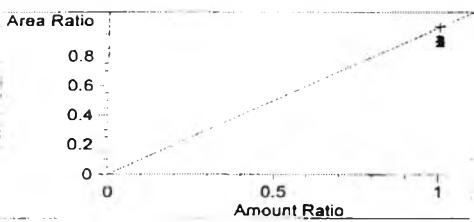

Dibromochloromethane at exp. RT: 2.509  
ECD1 B,  
Correlation: 0.99960  
Residual Std. Dev.: 74.80137  
Formula:  $y = mx + b$   
m: 1495.92782  
b: -91.35492  
x: Amount Ratio  
y: Area Ratio

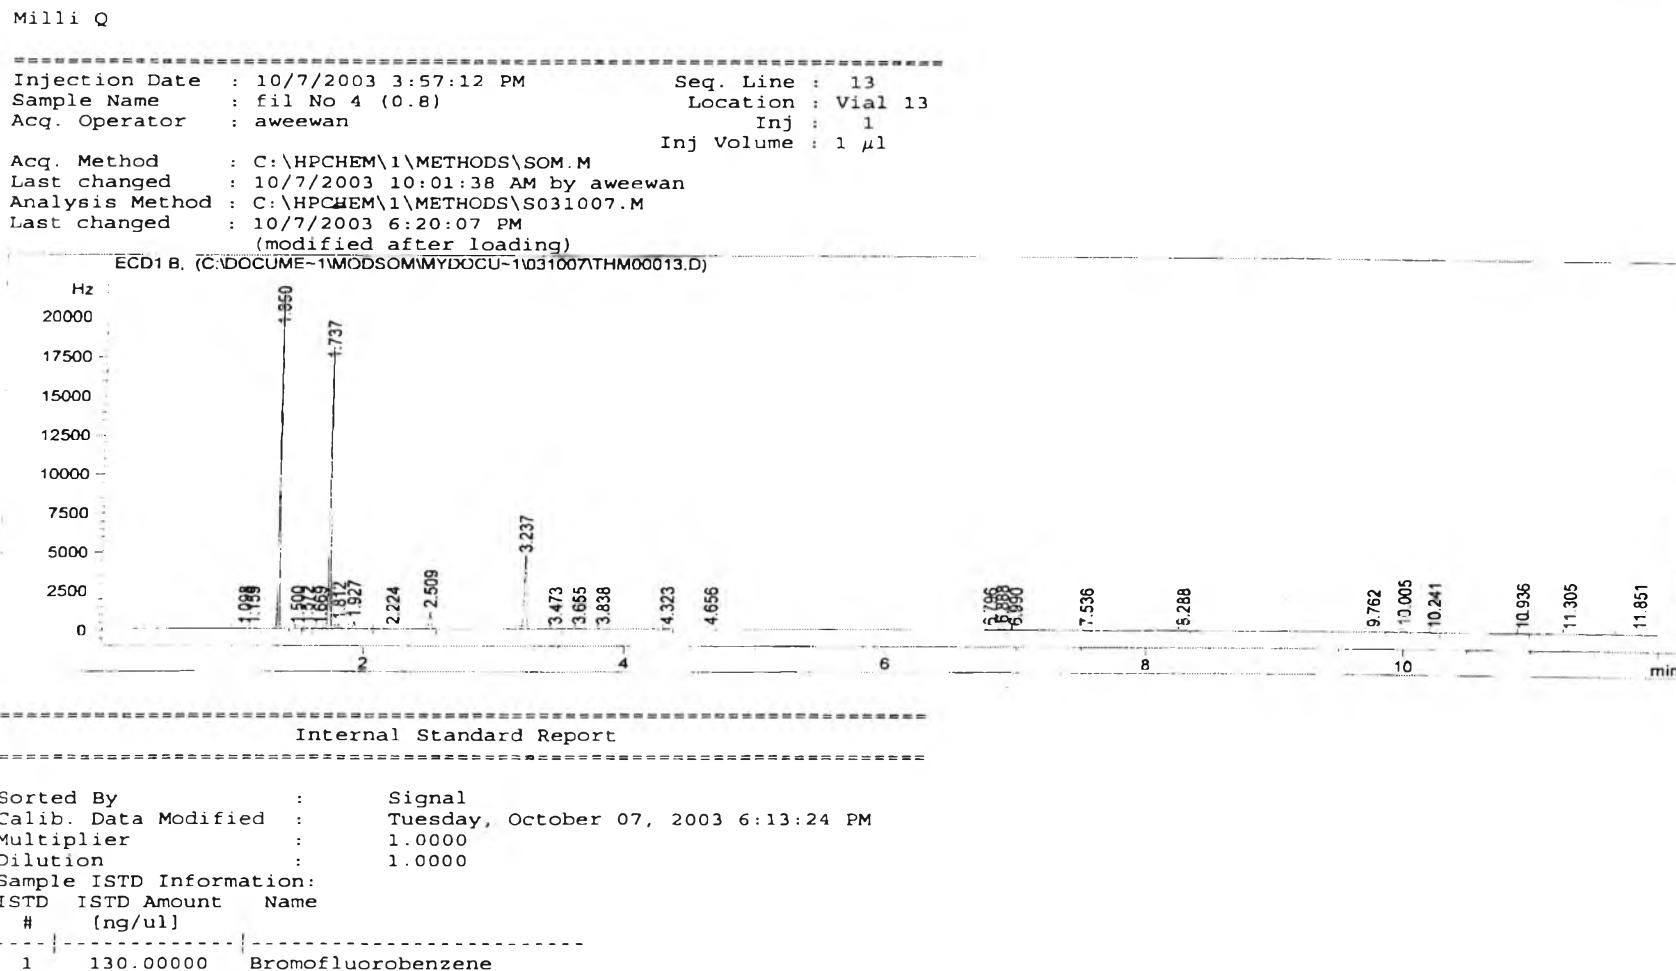

Bromoform at exp. RT: 3.654  
ECD1 B,  
Correlation: 0.99941  
Residual Std. Dev.: 32.93052  
Formula:  $y = mx + b$   
m: 544.96540  
b: -44.29958  
x: Amount Ratio  
y: Area Ratio

Bromofluorobenzene at exp. RT: 4.323  
ECD1 B,  
Correlation: 1.00000  
Residual Std. Dev.: 0.00000  
Formula:  $y = mx + b$   
m: 1.00000  
b: 0.00000  
x: Amount Ratio  
y: Area Ratio

## BIOGRAPHY

Name Aweewan Mangmeechai  
Date of Birth DEC 18, 1980  
Place of Birth Bangkok, Thailand  
Institution Attended Benjamaracharai School, Bangkok, Thailand

Certificate of Mathayomsuksa 5

Faculty of Environmental and Resource Study  
Major of Environmental Science and Technology ,  
Mahidol University

Bachelor of Sciences
